REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS Form 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animal being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not ye used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals an for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for wh the use of appropriate anesthetic, analgesic, or tranquiliz drugs would have adversely affected the procedures, res or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reas such drugs were not used must be attached to this report	F. TOTAL NUMBER OF ANIMALS (COLUMNS C + D + E)
4. Dogs					
5. Cats					
6. Guinea Pigs					
7. Hamsters					
8. Rabbits					
9. Non-human Primates					
10. Sheep					
11 Pigs			13		13
12 Other Farm Animals					
13 Other Animals					

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual rese teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and ap Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary inc brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

FACILITY LOCATIONS (Sites) - See Attached Listing

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS Form 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animal being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquiliz- ing drugs would have adversely affected the procedures, res- ults or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reason such drugs were not used must be attached to this report)	F. TOTAL NUMBER OF ANIMALS (COLUMNS C + D + E)
4. Dogs		2	16		18
5. Cats					
6. Guinea Pigs					
7. Hamsters					
8. Rabbits			377		377
9. Non-human Primates			4		4
10. Sheep	3		2		5
11. Pigs	4		111		115
12. Other Farm Animals					
Goats			12		12
13. Other Animals					

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and an Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Section 3: Facility Locations (Sites):

Carlson Animal Research Facility/Medical Center
BPSB

Also remote "Field Study" sites: Utah/Nevada: miscellaneous wild rodents; Argentina: wild rabbits; Costa Rica: *Alouatta* species.

IACUC-APPROVED EXCEPTIONS AND NUMBERS OF ANIMAL USED FOR USDA-COVERED SPECIES FOR THE PERIOD 10/01/06 THROUGH 09/30/07

ACUP 71684/71566 USDA Covered Species: Nonhuman Primate Number Used: 8
Exception: Water is not provided *ad libitum* during some parts of the study. Multiple major survival surgeries (implants) may be performed.

Rationale: These studies require rhesus monkeys to be motivated to perform simple behavioral tasks in anticipation of receiving fluid rewards. Thus fluids are sometimes restricted to the study sessions, where the animals are able to obtain fluids to satiety. The condition of the animals is closely monitored. They readily adapt to this schedule during active study periods. At other time fluids are provided continuously. Multiple major survival surgeries may be performed to provide data from multiple sites or to improve the health of the animals.

ACUP 71398 USDA-Covered Species: Nonhuman Primate Number Used: 7
Exception: Water is removed from the animals 7-10 hours prior to testing, thus water is not available at all times. Multiple major survival surgeries (implants) may be performed.
Rationale: The experimental design requires the animals to work for a juice reward by following a spot of light visually. Mild thirst increases the animals' interest and is not detrimental. Water is promptly returned following testing and animals are not allowed to become dehydrated. Multiple major survival surgeries may be performed to provide data from additional sites or to improve the health of the animals.

ACUP 71565 USDA-Covered Species: Nonhuman Primate Number Used: 7
Exception: Water is not provided *ad libitum* during some parts of this study. Multiple major survival surgeries (implants) may be performed.
Rationale: This study requires nonhuman primates to perform simple visual-motor tasks (move a lever to move a cursor) in order to obtain fluid rewards. Thus fluids are sometimes restricted to study sessions, where the animals are able to obtain fluids to satiety. The physical condition and hydration status of the animals are closely monitored. Multiple major survival surgeries may be performed to provide data from multiple sites or to improve the health of the animals.

ACUP 71383/71443/71469 USDA-Covered Species: Hamsters Number Used: 2320
Exception: The IACUC has approved housing Siberian Hamsters in 5" high cages based on their size (average 35 grams) as permitted in the Regulations. Some of these animals are subjected to cooler than normal temperatures and some may have food and water supplies controlled during parts of the studies. A small number are subjected to visual impairment through the use of opaque contact lenses.

Rationale: Taller cages are not required for these diminutive animals, and the shorter cages are actually beneficial in that they permit the animals to reach and climb about on the cage lids. Cooler temperatures and controlled food and water are employed to produce the normal physiological changes which occur in these Siberian-native species in their natural habitat. Their health is closely monitored and no deleterious effects have been observed.

ACUP 71689

USDA-Covered Species: Nonhuman Primate

Number Used: 2

Exception: Multiple major survival surgeries (cortical implants) may be performed.

Rationale: These are integral parts of the same study and are usually well-tolerated. Surgeries are done separately for safety--to avoid overly-long periods of anesthesia.
